# Research Conference

## Industrial Applied Data Science

October 18 and 19, 2018 in Lugano

University of Applied Sciences and Arts of Southern Switzerland (SUPSI),  
Department of Innovative Technologies

In order to address the growing influence of Data Science on many aspects of our lives, FTAL, the Association of Swiss Schools of Engineering, Architecture and Life Sciences, has to organize a scientific conference on applied research activities of their member schools in this field.

The first joint research event of the FTAL will focus on industrial applied research outcomes in this highly topical subject, especially in view of the enhanced offer in the following joint Master programs:

Since autumn 2017 the MSc Life Sciences offers the new option “Applied Computational Life Sciences“ and starting in autumn 2018 the MSc Engineering will propose the new option “Data Science”.

The research event is designed for to Master students, scientists and professors as well as industrial partners.

FTAL member schools will cover the inscription fees for their Master students.

Further information will soon be available via the website [www.ftal.net](http://www.ftal.net)
